

Quality Exterior Wood Shutters  
Mortise & Tenon Western Red Cedar  
Unfinished or Painted  
All Types & Sizes  
Authentic Hinges & Holdbacks

Jan 2015

Made In USA

Real wood shutters make all the difference...

## **Thanks for letting us serve you! A few kind words from our customers...**

*Thanks for all of your help. It has been a pleasure to work with you on this order. My house was named to the Historic Society in April, and I know the shutters will be a distinctive addition. **Katy Mutterer, New Jersey***

*Don't think I ever thanked you and everyone at Shuttercraft for all your work on the shutters. It was a pleasure and I look forward to working with you again soon. **Marsha Kroll, New York***

*We just wanted to drop a note of deepest thanks for all your patience and help throughout our shutter replacement & upgrade project. All shutters are now fully installed and they look fantastic. You patiently helped us figure out the order and overcome a few of our complexities. **Alan Free, Illinois***

*We couldn't be happier with the quality, design and craftsmanship of our shutters. Thanks to all for a great price and especially for your help with measuring. Everyone passing by comments on how wonderful they look, so I am glad I opted with wood rather than the 'easy way out' with vinyl. Well worth every dollar! **Gwen & Joe Marquardt, New Jersey***

*The shutters arrived yesterday- absolutely gorgeous! Thank you for your excellent work! **Kent McCoy, Connecticut***

**Family owned for over 25 years. Made in the USA.  
Call us today! We're here to help you get the right shutters!**

***Beautiful and Durable Western Red Cedar***

*These authentic wood shutters are appropriate for restoring vintage homes, public buildings or dressing up newly constructed houses. Functional hardware creates an authentic installation for historic accuracy and a touch of elegance. Yoke pins on louvers and tilt rods are dip galvanized to assure long life. Choose from three louver widths to help match existing historic shutters.*

*Cross rail location can be specified at NO CHARGE*

**MEASURING & CONSTRUCTION** - Shutters were the first storm windows ... Most are hinged to fill or cover the same opening as a storm window or screen when closed inside the trim casing. Although shutters today are often installed for decorative purposes, they look best when sized for the window opening. If shutters will be functional, measure the area they will fill or cover when closed. Allow 1/4" clearance all around the opening for shutters that will close into a window pocket (casing). Mortise & tenon construction is time tested, proven to provide long life in wood shutters, among many other wood products and antiques still with us today. Western red cedar is a renewable resource, the preferred wood for exterior shutters, and it is naturally decay resistant.

**Fixed Louvers**

**Moveable Louvers**

**Raised Panels**

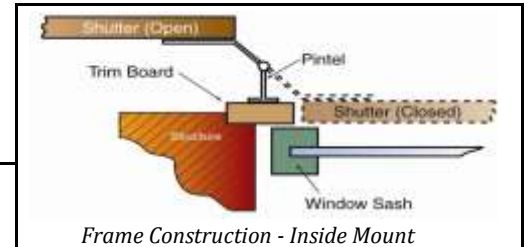

**HINGES & HOLDBACKS** - Lift-off hinges and pintles are common ways of mounting shutters to the casing. Holdbacks (shutter dogs) are used to "hold" the shutter open. We offer several hinge types and offsets, along with decorative or hidden holdbacks, latches, pull rings, and more... Stainless steel options are available for ocean areas.

**NO!** These plastic shutters make these houses look worse instead of better.

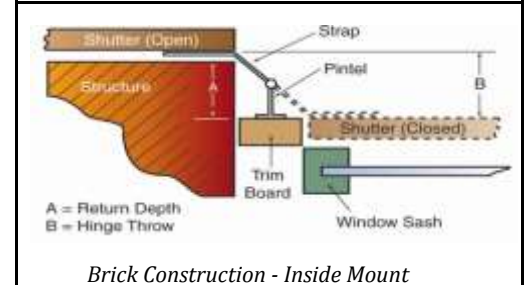

They are the wrong size for the window and mounted in the wrong location on the house.

**YES!** These real wood shutters are correctly sized for the window opening, mounted using authentic lift-off hinges & holdbacks. Real wood shutters make all the difference when the project is done right!
